حيدر غانم

Haider Ghanem

Full-stack engineer · Python, React, Flutter, ML

I design and build complete products: Python backends with FastAPI and Django, React and Flutter front ends, and the data and machine learning work behind them. **8+ production systems shipped**, with a focus on security, multi-tenant design and real-time features.

English

Professional working proficiency

Selected projects

01

BACKEND · SAAS

Smart Ordering Platform

Multi-tenant SaaS that lets restaurants in Iraq take orders through Telegram, with strict data isolation between businesses.

Django · Celery · PostgreSQL · React

02

AI PRODUCT

VoxLingo AI

Subtitles and dubs videos in any language, using Whisper for speech and Claude for translation.

FastAPI · Celery · FFmpeg · React

03

DATA SCIENCE

Diabetes Prediction

Clinical risk model with 92.3% accuracy and 0.956 ROC-AUC, tuned to miss as few patients as possible.

Python · Pandas · Scikit-learn · XGBoost

04

MOBILE

TripMind AI

Flutter travel planner that builds day-by-day itineraries with AI and keeps working offline.

Flutter · Riverpod · Firebase · OpenAI

05

WEB · FRONTEND

PIANOVA

A full 88-key piano in the browser, with lessons, a composition studio and a 3D piano.

Next.js · TypeScript · Supabase · Three.js
